

With our modern technologies, the world seems to get smaller every day. Despite this, local representation is often a way to ensure quick delivery and response times, which can be crucial for your process. Down time is limited to a minimum with the support of a good agent, providing first line service and local stock of key spare parts and consumables.

Since many new builds and retrofits take place in Asia, and our wish to provide expert guidance in these projects for both shipyards and end-users, we have our fully stocked subsidiary in Singapore. Here you can also apply for services and sampling. In addition to the Hatেনboer-Water offices in **The Netherlands, Singapore and the United Arab Emirates**, Hatেনboer-Water agents are located in Australia, China, India, Malaysia, Norway, South Korea, Turkey and the United Kingdom.
