

## Is your future in water?

Then you might be the colleague we're looking for!

### Projectleader India

#### Fulltime | India | International Engineering Projects

To strengthen our global project organization, we are looking for a Projectleader based in Pune, India. In this role, you will coordinate international (water treatment) projects and work closely with colleagues in the Netherlands and other countries.

You bring strong organizational skills, technical understanding, and a coaching leadership style that fits within a self-steering team.

#### What will you be doing?

As a Projectleader, you are responsible for the full execution of our projects: from planning and coordination to delivery. You work daily with engineering, production, procurement, and sales teams — often across different time zones.

Your responsibilities include:

- Defining project objectives, scope, and deliverables in collaboration with stakeholders
- Preparing detailed project plans including tasks, milestones, deadlines, and resource planning
- Monitoring project progress and implementing corrective or recovery actions when needed
- Coaching and supporting the project team
- Ensuring clear communication between all internal and external parties involved
- Identifying, managing, and mitigating project risks
- Managing the project budget and monitoring project costs
- Using available resources efficiently
- Requesting additional resources or approvals when required
- Identifying additional work and initiating PO adjustments with the customer
- Safeguarding quality standards and initiating improvement actions when deviations occur
- Supporting the Sales Engineer with technically accurate quotations
- Maintaining strong relationships with stakeholders and providing regular progress updates

You ensure that projects are delivered on time, within budget, and according to the required quality standards.

#### Who are you?

- Bachelor's or Master's level, preferably in a technical or business discipline
- Experience in project management within a technical environment
- A coaching and collaborative leadership style
- Strong organizational, communication, and teamwork skills
- Proactive, solution-oriented, and independent
- Experience working internationally or across multiple time zones
- Excellent command of the English language

#### What do we offer you?

- A competitive salary package
- The opportunity to work closely with our international team
- Learning and development opportunities through the Hatlenboer-Water Academy
- A dynamic role within a globally operating organization
- An open and supportive work culture

#### Who are we?

Hatenboer-Water BV, based in Schiedam (The Netherlands), has been "fresh in water" since 1906.

With around 90 enthusiastic colleagues in Schiedam and offices in Singapore, Dubai, Houston, Hamburg, and Aberdeen, we deliver high-quality solutions, services, and products. Engineering, R&D, production, marketing, and sales are all handled in-house, supported by — and in cooperation with — selected partners where needed.

#### Our employment basics

- A company laptop
- A competitive salary with solid secondary employment conditions
- An open culture and a motivated team
- The surprisingly versatile world of water!

#### Interested?
